

Experience Zone – Frequently Asked Questions

1. What is the Experience Zone?

The Experience Zone is a special area where manufacturers can display their vehicles live at the exhibition so visitors can see and experience the actual product.

2. Why has the Experience Zone been created?

Many companies promote their vehicles through photos, catalogs, or advertisements. The Experience Zone allows visitors to see the real vehicle, examine the build quality, and understand the product better.

3. Is this concept common in exhibitions?

No. The Experience Zone is a first-time concept in the expo industry, designed to give manufacturers a simple and affordable way to showcase their vehicles live.

4. What will a participant receive in the Experience Zone?

- Space to display vehicles
- A brand board placed on top of the vehicle
- A brochure stand for product information
- The option to display mobile numbers for direct enquiries

5. Who will see the vehicles in the Experience Zone?

More than 20,000 industry visitors are expected, including:

- Dealers
- Distributors
- Manufacturers
- Industry professionals
- Potential business partners

6. How does this help manufacturers?

Visitors do not just see pictures. They can see, feel, inspect, and evaluate the real vehicle, which creates much stronger interest and business enquiries.

7. Who should participate in the Experience Zone?

- EV manufacturers
- E-rickshaw manufacturers
- E-scooter manufacturers
- Electric tractor manufacturers
- New EV startups
- Companies launching new models or innovations

8. Why should manufacturers not miss this opportunity?

Because it offers a rare chance to showcase vehicles directly in front of thousands of industry visitors at a very affordable cost.
